

PROGRAMME OF STUDIES

1. Description

<i>Number of semesters: 4</i>	<i>Number ECTS points necessary to obtain qualifications: 120</i>
<i>Prerequisites:</i> <ul style="list-style-type: none"> • <i>completed undergraduate degree in Electrical Engineering at universities in Poland or abroad,</i> • <i>completed undergraduate degree in related field of study, verified by the Qualification Commission.</i> 	<i>Upon completion of studies graduate obtains professional degree of: master of science, engineer 2nd level qualifications</i>
<i>Possibility of continuing studies: 3rd level studies (PhD)</i>	<i>Graduate profile, employability:</i> <i>A graduate of the second degree studies in the specialization Industrial Electrical Engineering has advanced and well-established knowledge of electrical engineering applications in industrial processes including automation. Has ability to use computer tools for designing and modelling. It is capable of creative work and to make decisions and lead work-team labour. He is prepared to continue their education in third level studies (Ph.D. studies).</i>
<i>Indicate connection with University's mission and its development strategy:</i> <i>The knowledge gained during studies will not only lead to success in future professional career of the graduate, but also shapes the human being with a sense of entrepreneurship, creativeness and openness to new challenges.</i>	

2. Fields of science and scientific disciplines to which educational effects apply:

science field: technical sciences, science discipline: Electrical Engineering

3. Concise analysis of consistency between assumed educational effects and labour market needs:

Learning effects refer not only to the broadly understood electrical engineering, i.e. the application of electrical engineering in industrial processes, diagnostics and automation, but due to the demands of modern techniques and technologies currently used in electrical power engineering and industry - include electronic and microprocessor technology, computer science, management, and marketing. Obtaining the intended learning effects will enable graduates to find attractive and interesting work in all industries, where electrical engineering is applied. The graduate is also prepared to start business in electrical engineering field. Proceedings on the educational effects were refereed and discussed at meetings of the Faculty of Electrical Engineering Convent, including representatives of industrial enterprises in the Polish territory, with particular emphasis on the Lower Silesia and the neighboring provinces. During meetings the needs of labor market were explained and discussed.
