

FACULTY OF ELECTRICAL
ENGINEERING**SUBJECT CARD**

Name in Polish: **Komputerowe systemy sterowania pomiarami**
 Name in English: **Computer Control of Measurement Systems**
 Main field of study (if applicable): **Control Engineering and Robotics**
 Specialization (if applicable): **Automation of Machines, Vehicles and Apparatus**
 Level and form of studies: **2nd level, full-time**
 Kind of subject: **obligatory**
 Subject code: **ARR043308**
 Group of courses: **NO**

	Lecture	Classes	Laboratory	Project	Seminar
Number of hours of organized classes in University (ZZU):	30		15		
Number of hours of total student workload (CNPS):	90		30		
Form of crediting:	examination		crediting with grade		
For group of courses mark (X) final course:					
Number of ECTS points:	3		1		
including number of ECTS points for practical (P) classes :			1		
including number of ECTS points for direct teacher-student contact (BK) classes:	2.10		0.70		

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. He or she has a basic knowledge of metrology and measurement units, knows basic metrological characteristics of measuring instruments, are knowledgeable about the design of measurement known calculation methods used in developing the measurement results
2. He has a basic knowledge of the measurement technique. He knows measurement systems for high currents and voltages, rms converters, bridge systems for measuring resistance, reactance and impedance, circuits compensating voltage measurement. He knows the metrological characteristics of digital voltmeters
3. He or she knows the concepts of programming in C / C + + and object programming technique. He or she can write C/C++ program
4. He is able to do basic measurements of electrical devices using analog and digital oscilloscope. Can set on the basis of measurements of nonlinear characteristics of the elements. Able to present the results in the form of numerical tables and graphics to make their interpretations and draw conclusions.
5. He or she has knowledge of the measurement physical quantities (temperature, force, pressure, displacement ...) that are used at industrial automation systems.

SUBJECT OBJECTIVES

- C1. Acquisition of extensive knowledge in the field of architecture test and measurement systems, in particular the underlying hardware and software systems in high-level languages.
- C2. Understanding the methodology for designing a control and measurement systems with different degrees of complexity.
- C3. Extensive knowledge of practical implementation of measurement systems computer managed by an integrated software environment and includes standard interfaces and measuring instruments
- C4. Acquiring the knowledge needed to design the sensor signal conditioners of physical quantities.
- C5. Acquiring the parameterization ability of elements used at the measuring chain.
- C6. Acquisition and consolidation of social skills including emotional intelligence skills involving the cooperation of a group of students with a view to effective problem solving. Responsibility, honesty and fairness in the procedure observance force in academia and society.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

- PEK_W01 He or she has extensive knowledge in the structure area of the hardware layer and programming of control and measurement systems in high-level languages.
- PEK_W02 He knows and understands the design methodology of control and measurement systems. He has the knowledge to design components of the measurement system
- PEK_W03 He knows algorithms for processing measurement data.

relating to skills:

- PEK_U01 He has extensive skills practical implementation of measurement systems computer managed by an integrated development environment and standard interfaces and instruments
- PEK_U02 He or she is able to apply selected mathematical methods of measuring signal processing.
- PEK_U03 He or she has skills practical implementation of virtual measurement systems relating to social competences

relating to social competences:

- PEK_K01 He or she is aware of their own responsibility for their work and a willingness to comply with the principles of teamwork. He searches information and its critical analysis, properly identifies and resolves the dilemmas of working in the profession

PROGRAMME CONTENT

Form of classes - lecture		Number of hours:
Lec 1	Metrology and Measurement Systems Computer elementary functions. The structure and organization of measurement systems	2
Lec 2	Structure and Operation of digital measuring instruments - multimeter, oscilloscope	2
Lec 3	Logic analyzer.	2
Lec 4	Direct Digital Synthesis Generator and arbitrary waveform generator	2
Lec 5	Serial Interfaces in Measurement systems	2
Lec 6	GPIO (IEEE-488) Interface	2
Lec 7	Wireless network in measurement systems, USB and FireWire (IEEE 1394),	2
Lec 8	Mathematical methods of measuring data processing.	2
Lec 9	Software of measurement systems - an integrated software environment, discussion of the workings of graphical interfaces	2
Lec 10	VME, VXI and PXI Standard	2
Lec 11	SCPI model of instrument. Programming measurement systems using a dedicated library VISA and SCPI commands.	2
Lec 12	Distributed measurement and control systems	2
Lec 13	Data acquisition board - block diagram and programming	2
Lec 14	Sensors and signal transducers	2
Lec 15	Spectrum analyzer	2
Total hours:		30

Form of classes - laboratory		Number of hours:
Lab 1	Presentation of the safety rules and principles of assessment laboratory. Presentation of laboratory	1
Lab 2	Introduction to the programming environment, VISA and window that allows you to send and receive messages from the measuring devices. Construction of the device ID. Grammar and statement SCPI commands	2
Lab 3	Introduction to the SCPI command tree of oscilloscope and generator or DMM and Power supply. Control the instruments using a instrument Driver or Direct I / O	2
Lab 4	The SCPI status reporting system of devices. Setting masks and registers - handling of oscilloscope and generator or DMM and power supply errors	2
Lab 5	Implementation of the task - automatic determination of filter frequency characteristics or voltage-current characteristic of electronic devices	2
Lab 6	Programming the daq board- part 1. use Daq assistant for data acquisition from the analog-to-digital converter	2
Lab 7	Programming the daq board - part2: setting parameters of data acquisition, triggering sampling result caching, write data to the file	2
Lab 8	Programming a multifunction dac board: Use counters, digital inputs and outputs and analog outputs	2
Total hours:		15

TEACHING TOOLS USED

- N1. Traditional Lecture with audio-visual techniques
 N2. Laboratory run in the traditional manner of exercises + student groups, a report

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation <i>F - forming (during semester)</i> <i>P - concluding (at semester end)</i>	Educational effect number	Way of evaluating educational effect achievement
F1(W)	PEK_W01 PEK_W02 PEK_W03	test/exam
P(W)	P=F1	
F1(L)	PEK_U01 PEK_U02 PEK_U03 PEK_K01	Assessment of task done during laboratory activities
P(L)	P=F1
