

FACULTY OF ELECTRICAL
ENGINEERING**SUBJECT CARD**

Name in Polish: **Automatyka zabezpieczeniowa**
 Name in English: **Power System Protection**
 Main field of study (if applicable): **Electrical Engineering**
 Specialization (if applicable): **Electrical Power Engineering**
 Level and form of studies: **2nd level, full-time**
 Kind of subject: **obligatory**
 Subject code: **ELR042212**
 Group of courses: **NO**

	Lecture	Classes	Laboratory	Project	Seminar
Number of hours of organized classes in University (ZZU):	30		30		
Number of hours of total student workload (CNPS):	60		90		
Form of crediting:	crediting with grade		crediting with grade		
For group of courses mark (X) final course:					
Number of ECTS points:	2		3		
including number of ECTS points for practical (P) classes :			3		
including number of ECTS points for direct teacher-student contact (BK) classes:	1.40		2.10		

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Has properly founded and structured knowledge needed to understand the purposes and targets of modern power system protection.
2. Has basic knowledge about operation criteria and application techniques of protection of main power system elements
3. Is able to correctly conduct testing of digital as well as analog relay protection units.

SUBJECT OBJECTIVES

- C1. Acquaintance with modern solutions for power system protection
 C2. To gain practical knowledge and skills for selection of proper relaying criteria for machinery and electrical networks
 C3. To gain practical skills to apply modern methods, techniques and measuring tools for individual relays and sets of protection testing
 C4. To gain practical skills needed for connecting secondary circuits of relay protection, conducting testing and preparing reports

SUBJECT EDUCATIONAL EFFECTS*relating to knowledge:*

- PEK_W01 Has consolidated and well founded theoretical knowledge necessary to understand functions and operation principles of modern control automatic and protection (eliminative, regenerative and preventive) of power system
 PEK_W02 Understands methodology of calculation of criteria quantities and set up values of power system protections reacting on phase-to-phase faults.

relating to skills:

- PEK_U01 Is able to connect secondary current and voltage circuits of relay protections.
 PEK_U02 Is able to select proper sets of relays and to measure characteristics of protection.

relating to social competences:

- PEK_K01 Is conscious about responsibility for his own work and is willing to acknowledge teamwork rules.

PROGRAMME CONTENT

Form of classes - lecture		Number of hours:
Lec 1	Overview of lecture, requirements, literature and assessment methods. Basic characteristics, classification and role of power system eliminative, preventive and regenerative protection	2
Lec 2	Principles of operation and setting up of automatic switching of feeding system. Problems with switching of feeding of asynchronous motors.	2
Lec 3	Characterization of transient faults. Overview on requirements for auto reclosing automatics. Operation criteria and principles of setting of auto reclosing equipment in transmission and distribution lines.	2
Lec 4	Characterization of phenomena occurring in power electric system after disturbing active power balance.	2
Lec 5	Criterion for solution, setting and operation of Under Frequency Load Shedding equipment (UFLS).	2
Lec 6	Characterization of phenomena occurring in power electric system after disturbing reactive power balance. Principles and criterion of operation and setting of Under Voltage Load Shedding equipment (UVLS).	2
Lec 7	The functions of special protection in electric power system. Examples of practical solutions.	2
Lec 8	Local and remote backup protection systems. Busbar protection.	2
Lec 9	Distributed generation (DG) protection. Impact of DG on the operation conditions of the network protection.	2
Lec 10	Methods and equipment for automatic fault localization and switching in distribution network. Self healing networks.	2
Lec 11	Application of synchrophazors in power system protection	2
Lec 12	Communication protocols used in relays	2
Lec 13	Use IEC 61850 protocol for communication between power station components	2
Lec 14	Review of modern equipment used in analyzed automatics	2
Lec 15	Evaluation test	2
Total hours:		30

Form of classes - laboratory		Number of hours:
Lab 1	Presentation of safety regulations and regulations of laboratory. Assessment rules. Overview of laboratory stations.	3
Lab 2	Test of zero sequence current filters	3
Lab 3	Test of inverse time-delay relays	3
Lab 4	Test of HV motors protection	3
Lab 5	Test of distance relays	3
Lab 6	Test of automatic switching of feeding system	3
Lab 7	Test of auto-reclosing units	3
Lab 8	Test of power lines differential protection	3
Lab 9	Test of synchronous generator protections	3
Lab 10	Assessment and completion of test reports.	3
Total hours:		30

TEACHING TOOLS USED

- N1. Problem lecture
- N2. Lecture with use of multimedia techniques.
- N3. Laboratory with measurements traditionally arranged
- N4. Assessment in form of oral or writing test
- N5. Preparation of tests and measurements report

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation <small>F - forming (during semester) P - concluding (at semester end)</small>	Educational effect number	Way of evaluating educational effect achievement
F1(W)	PEK_W01 PEK_W02	Evaluation test
P(W)	P=F1	
F1(L)	PEK_U01 PEK_U02 PEK_K01	Preparation for laboratory assessment and activity during laboratory
F2(L)	PEK_U01 PEK_U02 PEK_K01	Assessment of laboratory reports
P(L)	P=0,5F1+0,5F2
