

FACULTY OF ELECTRICAL
ENGINEERING**SUBJECT CARD**

Name in Polish: **Sterowanie obciążeniami elektrycznymi**
 Name in English: **Load management**
 Main field of study (if applicable): **Electrical Engineering**
 Specialization (if applicable): **Electrical Power Engineering**
 Level and form of studies: **2nd level, part-time**
 Kind of subject: **obligatory**
 Subject code: **ELR052574**
 Group of courses: **NO**

	Lecture	Classes	Laboratory	Project	Seminar
Number of hours of organized classes in University (ZZU):	22				
Number of hours of total student workload (CNPS):	30				
Form of crediting:	crediting with grade				
For group of courses mark (X) final course:					
Number of ECTS points:	1				
including number of ECTS points for practical (P) classes :					
including number of ECTS points for direct teacher-student contact (BK) classes:	0.70				

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. The student has mastered a basic knowledge on electrical engineering (active and reactive power, active and reactive energy, power compensation, power factor, voltage, current).
2. The student can properly and effectively apply the principles and laws of physics in the qualitative and quantitative analysis of physical aspects of engineering.
3. The student understands and knows the need for continuous training opportunities and improves their professional competence.

SUBJECT OBJECTIVES

- C1. To acquaint students with the demand management.
 C2. To acquaint students with the knowledge on electrical tariffs and tariff policy.
 C3. A student will acquire practical knowledge and skills of efficient, rational and efficient use of electricity.

SUBJECT LEARNING OUTCOMES*relating to knowledge:*

- PEU_W01 The student has mastered knowledge on principles of saving energy, energy efficiency and rational use of energy.
 PEU_W02 He has knowledge of the importance and methods of formulation of the loads.
 PEU_W03 The student has knowledge on a tariff policy.

*relating to skills:**relating to social competences:*

- PEU_K01 The student is aware of the need for economical and rational use of energy.

PROGRAMME CONTENT		
Form of classes - lecture		Number of hours:
Lec 1	Presentation of the course, requirements and a method of assessment, description of definitions of key concepts.	1
Lec 2	Presentation of the structure of the polish energy sector, discuss the principles of the functioning of energy markets.	1
Lec 3	Presentation of: EU energy policy, the Polish energy policy, EU directives on rationalization of electricity, Energy Efficiency Act etc.	3
Lec 4	Analysis of load charts (load shape), analysis of a power ordered.	1
Lec 5	Energy management - methods, energy management tools.	2
Lec 6	Saving electricity - from design to use.	2
Lec 7	Energy management in an enterprise.	1
Lec 8	A reactive power in a power system, loss of electricity.	1
Lec 9	Rational use of electricity in industrial company and households.	1
Lec 10	Programs DSR, a tariff's policy, a role of tariffs in the DSM - the impact of tariffs.	3
Lec 11	The use of smart grid in the field of electricity load shaping.	4
Lec 12	Final test	2
Total hours:		22

TEACHING TOOLS USED
N1. Informative lecture, multimedia presentations.

EVALUATION OF SUBJECT LEARNING OUTCOMES ACHIEVEMENT		
Evaluation <i>F - forming (during semester) P - concluding (at semester end)</i>	Educational effect number	Way of evaluating educational effect achievement
F1(w)	PEU_W01 PEU_W02 PEU_W03 PEU_K01	Test
P(w)	P=F1	

PRIMARY AND SECONDARY LITERATURE
