FACULTY OF ELECTRICAL ENGINEERING

SUBJECT CARD

Name in Polish:	**Zabezpieczanie i sterowanie rozproszonymi źródłami energii 1**
Name in English:	**Protection and Control of Distributed Energy Sources 1**
Main field of study (if applicable):	**Electrical Engineering**
Specialization (if applicable):	**Renewable Energy Systems**
Level and form of studies:	**2nd level, full-time**
Kind of subject:	**obligatory**
Subject code:	**ELR052137**
Group of courses:	**NO**

	Lecture	Classes	Laboratory	Project	Seminar
Number of hours of organized classes in University (ZZU):	15		15		
Number of hours of total student workload (CNPS):	60		30		
Form of crediting:	crediting with grade		crediting with grade		
For group of courses mark (X) final course:					
Number of ECTS points:	2		1		
including number of ECTS points for practical (P) classes :			1		
including number of ECTS points for direct teacher-student contact (BK) classes:	1.40		0.70		

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Student should have the basic knowledge of fundamentals of circuit theory and basics of differential calculus.
2. Student should know how to analyse steady states and transients in linear circuit
3. Student should have ability to think and act in a creative way. Student should have ability to work in a team.

SUBJECT OBJECTIVES

C1. To provide knowledge of methods related to electric power network protection.
C2. Learning how to formulate criteria and schemes for fault detection in power networks.
C3. To provide knowledge of modelling and simulation of transient phenomena in electric power lines.
C4. Learning how to control of distributed generation system.

SUBJECT LEARNING OUTCOMES

relating to knowledge:

PEU_W01 Student gets the knowledge on description of phenomena accompanying faults in power networks.
PEU_W02 Student gets the knowledge regarding the applied criteria in protective relays.

relating to skills:

PEU_U01 Student is able to model linear elements and branches and also a power transmission line with distributed parameters, in particular, applying the ATP-EMTP programme.
PEU_U02 Student is able to define basic fault detection criteria for protection of distributed generation networks.

relating to social competences:

PEU_K01 Student can act independently and cooperate within a group working on a complex engineering project.

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours:**
Lec 1	General introduction – aims of the course. Establishing conditions for passing and marking the course. Principle of the line and generators protection.	2
Lec 2	Principle of the MV network protection depending on neutral grounding..	2
Lec 3	Methods of distributed generation interconnection with the network.	2
Lec 4	Influence of distributed generation connection with the network from the protection point of view.	2
Lec 5	Methods applied for loss of mains detection..	2
Lec 6	Protection and control of the photovoltaic generation station.	2
Lec 7	Algorithms applied for DFIG and wind turbine control.	2
Lec 8	Pass test.	1
	Total hours:	**15**

Form of classes - laboratory		**Number of hours:**
Lab 1	Presentation of health and safety rules, and general regulations of the laboratory. Establishing conditions for passing and marking the project course. General familiarization with the ATP-EMTP program.	2
Lab 2	Simulation of transmission line with distributed parameters. Analysis of interconnection between distributed generation and the utility network.	2
Lab 3	Testing of the synchronous generation with excitation control scheme.	2
Lab 4	Simulation of double fed induction generator connection to the network.	2
Lab 5	Simulation analysis of the algorithms applied for loss of mains detection.	2
Lab 6	Simulation analysis of the over-current protection.	2
Lab 7	Simulation analysis of the over-current transformer protection.	2
Lab 8	Additional term	1
	Total hours:	**15**

TEACHING TOOLS USED
N1. Informative lecture.
N2. Simulation program ATP-EMTP.
N3. Lab reports.

EVALUATION OF SUBJECT LEARNING OUTCOMES ACHIEVEMENT		
Evaluation *F – forming (during semester)* *P – concluding (at semester end)*	**Educational effect number**	**Way of evaluating educational effect achievement**
F1(W)	PEU_W01 PEU_W02	Attendance on lectures
F2(W)	PEU_W01 PEU_W02	test
P(W)	P=0,1*F1+0,9*F2	
F1(L)	PEU_U01 PEU_U02	Project reports
F2(L)	PEU_U01 PEU_U02	Activity in the project work
P(L)	P=0,3*F1+0,7*F2
